PRESS RELEASE

Voorhees, New Jersey, USA

May 20, 2009

Anagenesis Trees Corporation (ATC) announced today that it had appointed Mr. Vinod Gupta to the Advisory Board of its Indian subsidiary, Anagenesis Bioenergy Private India Ltd (ABPI).

Mr. Vinod Gupta is the founder and former Chief Executive Officer (CEO) and Chairman of infoGROUP® (NASDAQ: IUSA), a global database provider with revenues of \$750 million and over 5,000 employees. Mr. Gupta served as CEO of the company from the time of its incorporation in 1972 until September 1997 and from August 1998 to August 2008. Recognized in Bill Clinton's book Giving, the company was described as one that "has made a concerted effort to hire people who were on welfare, as well as people who are disabled or who have to support themselves after getting out of unsafe domestic situations." Mr. Gupta was born in Rampur Maniharan, India. He received a degree in agricultural engineering from the Indian Institutes of Technology (IIT) in 1967, when he moved to the United States to get his Masters degree. He graduated from the University of Nebraska at Lincoln with an MS in Agricultural Engineering in 1969 and an MBA in 1971.

Mr. Gupta will serve as Advisor to the Board of ATC's Indian subsidiary, ABPI, which aims to produce electricity in a clean, green and sustainable way in the district of Tamil Nadu, India, where power shortages (up to 30% at peak) are a daily phenomenon. The first phase of the project (100 MWh) will create a minimum of 2,500 long-term agricultural jobs for local people. Upon implementation of the project, it is ABC's intention to expand the business to other regions within India as well as in other countries.

ATC's CEO, Kyriacos Koutzis, stated:

"The appointment of Mr. Gupta to the Advisory Board of ABPI adds value and tangible momentum to our Indian venture. His entrepreneurial track record is exceptional and we are thrilled that he wishes to participate in the deployment of our green energy mission in Tamil Nadu and beyond."

Vinod Gupta stated:

"The business model of ABPI is unique in so many ways. Looking beyond the solid environmental and financial aspects, this venture also stands to directly improve living conditions for thousands of people."
